

1. Search in your Windows Start Menu for “Remote Desktop Connection” and open the following application

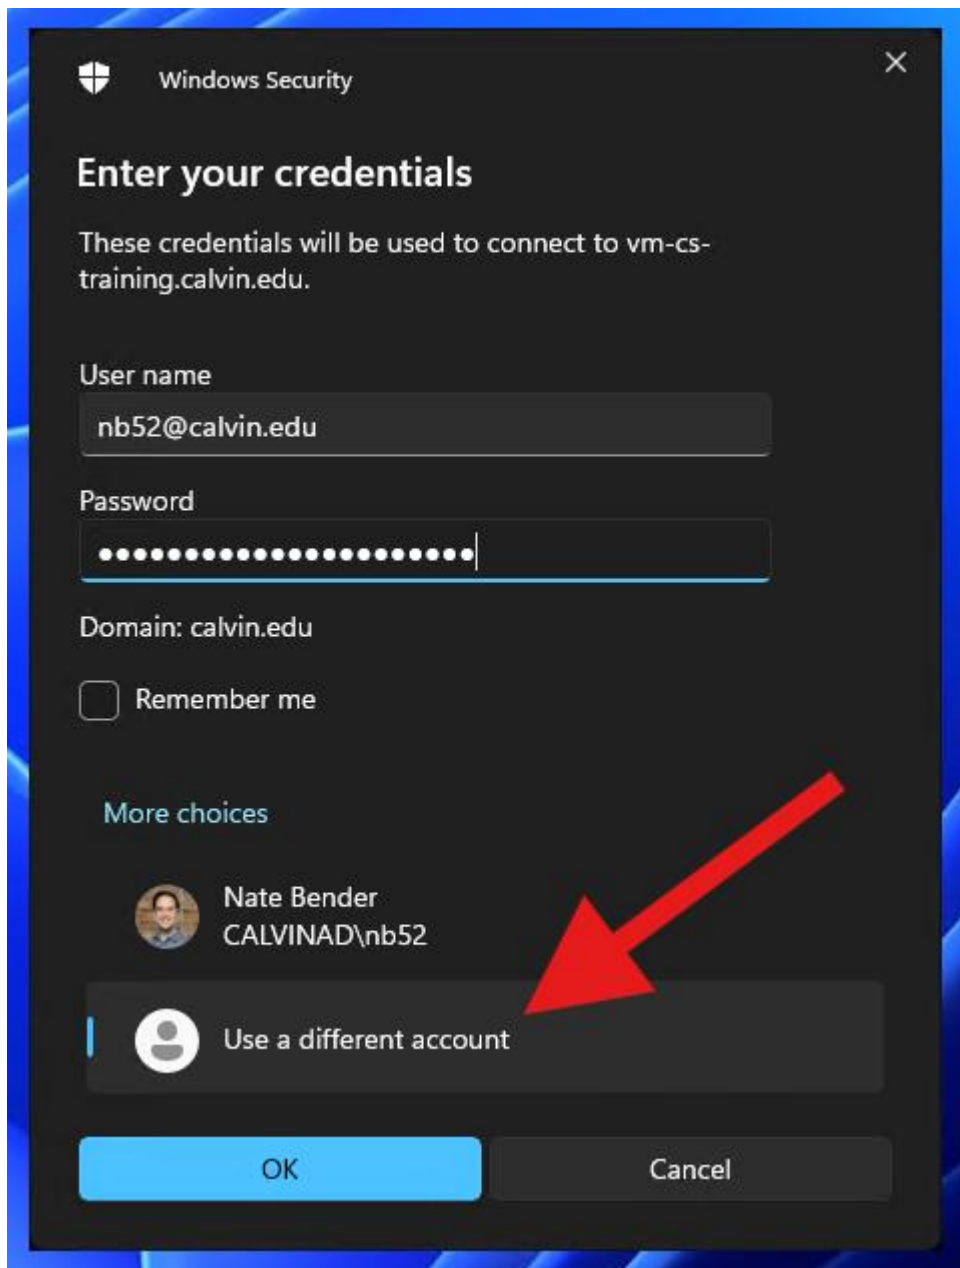

2. In the window that opens, enter the name of the server (vm-cs-training.calvin.edu) and press Connect.

3. A window prompting you for credentials will open. If both a username and password field are not visible, press "Use a different account," then enter your Calvin username (e.g.

je38@calvin.edu) and your password. Press connect.

4. If a window opens saying “The identity of the remote computer cannot be verified,” you can disregard this message and press yes.
5. A window will open showing you the desktop of the server and will then log into your account, allowing you to use the machine as though you were physically in front of it.

6. When you are done working on the remote server, use the connection bar at the top to disconnect, and you will return to your local computer's desktop.
